## Foreign Investor

+\$5

Starts the game with \$4 in treasury.

**Phase 5:** Buys as many private companies as possible, in ascending face value order.

**Phase 6:** Offers private companies for maximum price. If more than one corporation wants to buy the same private company, the corporation with the higher share price has priority.

**Phase 7:** Closes private companies with negative income.

**Phase 8:** Earns \$5 plus normal income from private companies.
